Q.13 A question is followed by two statements numbered I and II. You have to decide whether the data provided in the statements are sufficient to answer the question. Read both the statements and select the most appropriate answer.

Five trees J, R, S, U, and Z are of different heights. Which among them is the tallest tree?

(I) Only three trees are taller than S. U is shorter than S.

(II) R is taller than J. J is taller than Z.

- Ans  1. Data in Statement I alone is sufficient to answer the question while data in statement II is not
-  2. Both statements I and II together are NOT sufficient to answer the question
-  3. Both statements I and II together (and not statement I alone or statement II alone) are sufficient to answer the question
-  4. Data in Statement II alone is sufficient to answer the question while data in statement I is not

Q.14 In this question two statements I and II have been given. These statements maybe independent causes or effects of independent causes or a common cause. One of the statements maybe the effect of the other statement. Read both the statements and select the correct option.

Statements:

I. Despite a significant increase in the number of phone covers available in the market, many people continue to use their phones without covers.

II. Over the past few years, many phone cover manufacturers have reported a decline in sales and demand for their products.

- Ans  1. Statement II is the cause and statement I is its possible effect.
-  2. Both statements I and II are effects of independent causes.
-  3. Statement I is the cause and statement II is its possible effect.
-  4. Both statements I and II are independent causes.

Q.16 A question is followed by two statements numbered I and II. You have to decide whether the data provided in the statements are sufficient to answer the question. Read both the statements and select the most appropriate answer.

Six people, F, P, R, T, V, and Z are sitting in a row, facing the north. Who sits to the immediate left of T?

(I) Only four people sit between Z and V. R sits to the immediate left of Z.

(II) Only two people sit to the left of F. Only two people sit to the right of T.

Ans ☒ 1. Data in Statement I alone is sufficient to answer the question while data in statement II is not

☒ 2. Both statements I and II together are NOT sufficient to answer the question

☒ 3. Data in Statement II alone is sufficient to answer the question while data in statement I is not

☒ 4. Both statements I and II together (and not statement I alone or statement II alone) are sufficient to answer the question

Q.20 Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statements:

All bins are dogs.

All dogs are aeroplanes.

Some aeroplanes are clothes.

Conclusions:

(I): All bins are aeroplanes.

(II): Some clothes are bins.

Ans ✗ 1. Neither conclusion (I) nor (II) follows

✗ 2. Both conclusions (I) and (II) follow

✓ 3. Only conclusion (I) follows

✗ 4. Only conclusion (II) follows

Chosen Option : **1**

Comprehension:

Read the given passage and answer the questions that follow.

A giant planet 124 light years from Earth has yielded the strongest evidence yet that extraterrestrial life may be thriving beyond our solar system, astronomers claim.

Observations by the James Webb space telescope of a planet called K2-18 b appear to reveal the chemical fingerprints of two compounds that, on Earth, are only known to be produced by life.

Detection of the chemicals, dimethyl sulphide (DMS) and dimethyl disulphide (DMDS) would not amount to proof of alien biological activity but could bring the answer to the question of whether we are alone in the universe much closer.

"This is the strongest evidence to date for a biological activity beyond the solar system," said Professor Nikku Madhusudhan, an astrophysicist at the University of Cambridge who led the observations. "We are very cautious. We have to question ourselves both on whether the signal is real and what it means."

He added: "Decades from now, we may look back at this point in time and recognise that it was when the living universe came within reach. This could be the tipping point, where suddenly the fundamental question of whether we're alone in the universe is one we're capable of answering."

Others are more sceptical, with questions remaining about whether the overall conditions on K2-18 b are favourable to life and whether DMS and DMDS, which are largely produced by marine phytoplankton on Earth, can be reliably regarded as biosignatures.

K2-18 b is nearly nine times as massive as the Earth and 2.6 times as large.

SubQuestion No : 16

Q.16 Based on the passage, which of the following statements is true?

- Ans  1. It would take humans 124 years to travel to K2-18 b.
-  2. The scientists leading the observations are being careful not to read too much into them.
-  3. Most creatures on Earth produce DMS and DMDS.
-  4. The presence of DMS and DMDS is sufficient to prove that alien life exists.
